AVAILABILITY & PREFERENCES

My search is focused on Contract engagements with clear scope and duration. I am set up for fully Remote work and collaborate well with distributed teams. I plan to remain in my current location and am not seeking a relocation package at this time.

When scheduling recruiter or hiring-manager conversations, during afternoons after 2pm tends to work best on my calendar.

Aiming to transition from data science into a machine learning engineering role where I can build production-grade ML pipelines and recommendation systems.

My primary professional credential stays valid through 2026-11-30, and I am targeting total annual compensation around 145000 for the next step in my career.

If my main line is unavailable, you can also reach me at +1 212 555 0187 or james.patel.pro@outlook.com. A wider collection of work and references lives at <https://www.kaggle.com/jamespatel>.

PROFESSIONAL SUMMARY

Senior Data Scientist with 5 years of experience in financial data modeling, NLP, and large-scale ML systems. Proven track record shipping models to production at Bloomberg.

WORK EXPERIENCE

Senior Data Scientist

Bloomberg LP · 2021 – Present · New York, NY

- Built NLP pipeline classifying 500K daily news articles with 94% accuracy
- Designed A/B testing framework cutting experiment cycle from 2 weeks to 3 days

Data Scientist

JPMorgan Chase · 2019 – 2021 · New York, NY

- Developed credit risk scoring model that reduced default rate by 18%
- Automated daily reporting pipeline saving 40 analyst-hours per week

EDUCATION

M.S. Statistics | Columbia University | 2019

B.S. Mathematics | University of Michigan | 2017

CERTIFICATIONS

Google Professional Data Engineer — active through 2026-11-30

SKILLS

Python, R, TensorFlow, Spark, SQL, Airflow, Kafka, dbt
