

Michael Torres

m.torres@gmail.com | +1 206 555 0198 | Seattle, WA, USA

AVAILABILITY & PREFERENCES

I am pursuing Full-time roles where I can commit fully to one team. I am flexible across Remote and Weekly travel setups depending on team needs. I would consider relocating for the right long-term opportunity if the role and team are a strong fit.

When scheduling recruiter or hiring-manager conversations, during Monday to Friday, 9am to noon tends to work best on my calendar.

Seeking a senior DevOps or SRE role where I can build scalable cloud infrastructure and drive cost optimization initiatives across engineering teams.

My primary professional credential stays valid through 2026-06-30, and I am targeting total annual compensation around 135000 for the next step in my career.

If my main line is unavailable, you can also reach me at +1 512 555 0087 or mike.torres.devops@yahoo.com. A wider collection of work and references lives at <https://github.com/mitorres>.

PROFESSIONAL SUMMARY

DevOps Engineer with 8 years of experience managing large-scale AWS infrastructure. Specialist in Terraform, Kubernetes, and CI/CD pipeline automation.
