WORK PREFERENCES

I am open to traveling regularly for client work or team meetings, typically within a 200 mile radius of my base location. I prefer Remote work arrangements and have set up a Dedicated room in my home for focused engineering work.

My technical expertise spans both Backend and Data engineering. For backend development, I primarily work with Django and FastAPI frameworks. On the data side, I am proficient with Apache Spark and Airflow for pipeline orchestration.

I am available to start in 4 weeks and typically work on a contract basis with a preferred rate of \$150/hour for independent consulting projects.

PROFESSIONAL SUMMARY

Full-stack engineer with 9 years of experience building scalable data platforms and backend services. Expertise in Python, distributed systems, and cloud infrastructure.

WORK EXPERIENCE

Senior Backend Engineer

Databricks · 2021 – Present · San Jose, CA

- Architected real-time data ingestion pipeline processing 50TB+ daily
- Led migration from monolith to microservices, improving deploy frequency 10x

Backend Engineer

Uber · 2017 – 2021 · San Francisco, CA

- Built fraud detection ML pipeline reducing false positives by 35%
- Optimized core API endpoints, cutting P95 latency from 800ms to 120ms

Software Engineer

LinkedIn · 2015 – 2017 · Mountain View, CA

- Developed recommendation engine serving 500M+ members

EDUCATION

M.S. Computer Science | Stanford University | 2015

B.Tech Computer Science | IIT Bombay | 2013

SKILLS

Python, Django, FastAPI, Apache Spark, Airflow, Kafka, PostgreSQL, Redis, AWS, Kubernetes
