Professional Summary

Senior Backend Engineer with 8 years of experience building scalable data pipelines and microservices. I work remotely from home with a dedicated room setup for maximum productivity. I'm willing to travel up to 100 miles for team meetings or client visits. My expertise spans backend development and data engineering, with deep knowledge of Django and FastAPI frameworks. I prefer using Apache Spark for large-scale data processing. I have 30 days notice period and am seeking contract roles at \$95/hour. Previously worked at the San Francisco office before transitioning to full remote work.

Work Experience

Senior Backend Engineer

DataFlow Systems | 2020 - Present

- Architected microservices using Django and FastAPI for real-time data processing
- Built ETL pipelines with Apache Spark processing 10TB+ daily
- Led remote team of 5 engineers across 3 time zones
- Implemented CI/CD pipelines reducing deployment time by 60%

Backend Developer

CloudTech Inc | 2017 - 2020

- Developed RESTful APIs using Django REST Framework
- Optimized database queries reducing response time by 40%
- Collaborated with data science team on ML model deployment
- Mentored 3 junior developers in backend best practices

Education

M.S. Computer Science — Stanford University, 2017

B.S. Software Engineering — UC Berkeley, 2015

Technical Skills

Python • Django • FastAPI • Apache Spark • PostgreSQL • Redis • Docker • Kubernetes • AWS • Git

Additional Information

I maintain a professional home office with dedicated room for deep work. Available for contract positions at \$95/hour with 30 days notice period. Open to travel within 100 miles radius for important meetings or workshops. Remote work preference allows me to maintain work-life balance while delivering high-quality results.
